Spring Cloud Streams

Application Model

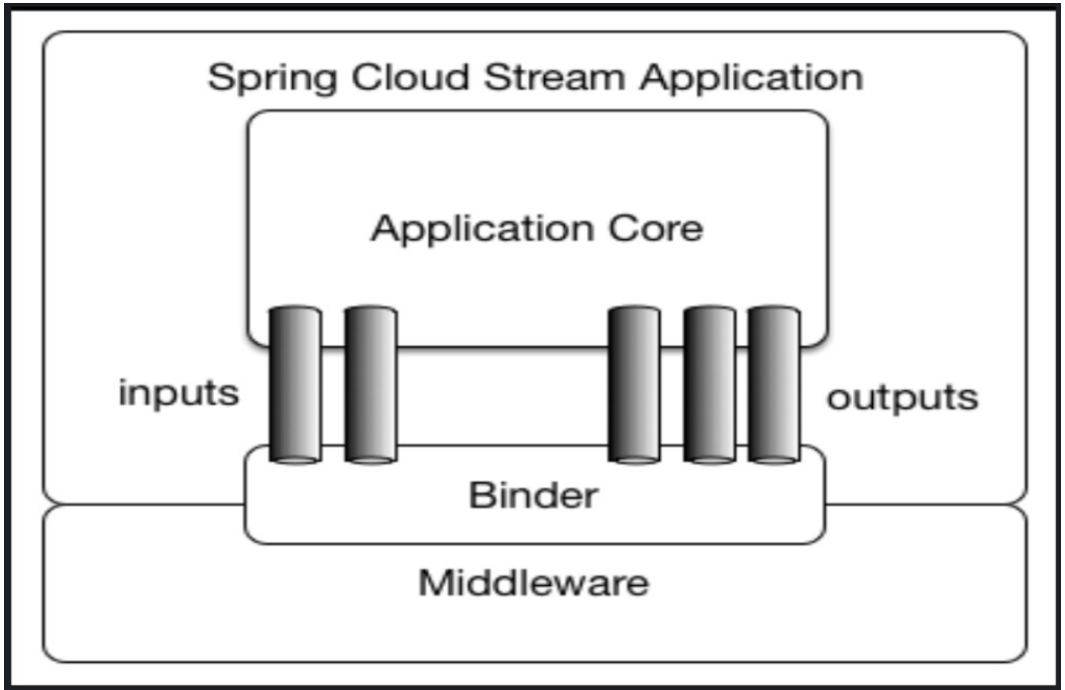

Figure 1. Spring Cloud Stream Application

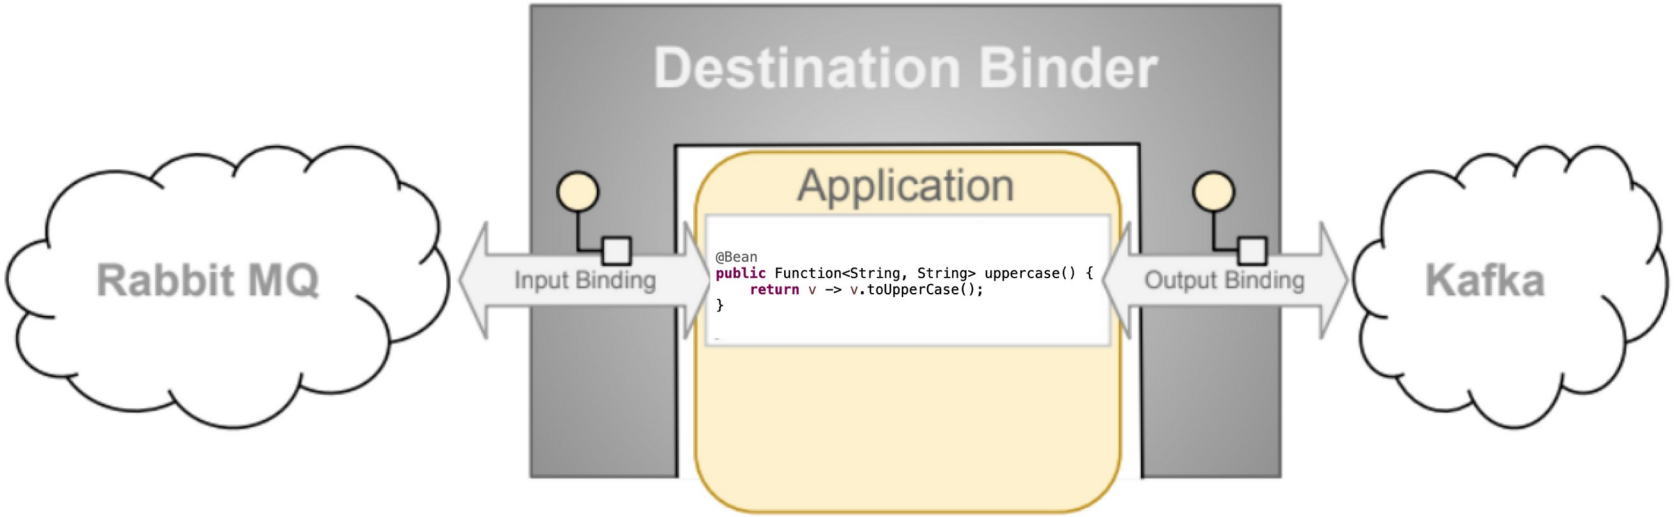
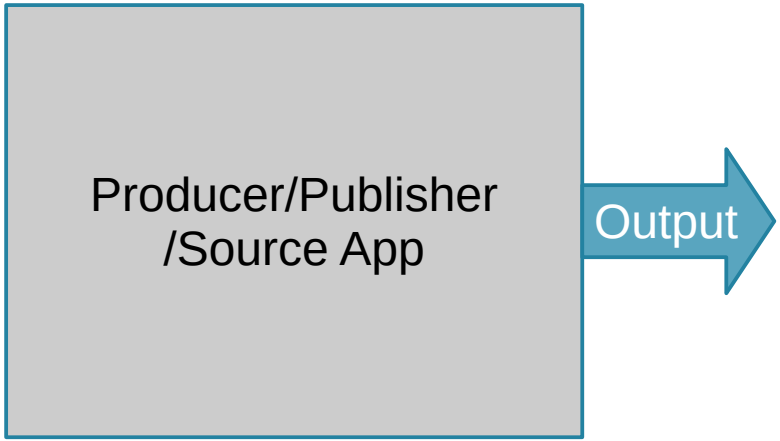
Programming Model

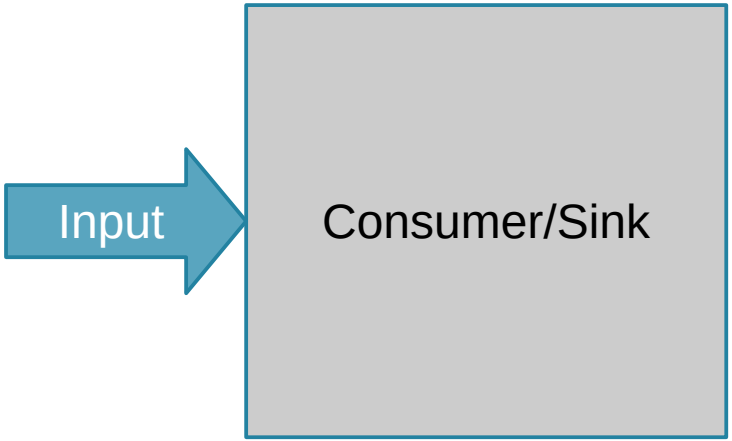


- Binders
- Bindings

```
@Bean
public Supplier<String> supply() {
  return () -> dataService.getLatestData();
}
```



```
@Bean
public Consumer<String> consume() {
    return data -> service.sendToMySink(data);
}
```



```
@Bean
public Function<String, String> process() {
  return input ->
service.doSomethingWithTheData(input);
}
```
